## Lightening Perfection Crème pH 4.5 \$35 - 2oz

**Skin Type:** An ideal skin lightener for hyperpigmentation, sun spots and melasma.

**Purpose:** An advanced lightening skin cream containing maximum strength hydroquinone to gently fade skin discolorations along with a unique combination of plant extracts (scutellaria, white mulberry, saxifrage, and grape) with very high de-pigmentation effectiveness that acts in synergy to block the formation of melanin.

### Active Ingredient:

Hydroquinone 2.00%

### Key Ingredients:

Morus Bombycis (White Mullberry) Root Extract

Scutellaria Baicalensis Root Extract

Saxifraga Sarmentosa Extract

Vitis Vinifera (Grape) Fruit Extract

Magnesium Ascorbyl Phosphate

### Purpose:

Skin Lightener

### Known Benefits:

Strong brightening properties

Antioxidant benefits, helps balance skin tone

Natural brightening properties

Rich in bioflavonoids, natural astringent properties

Strong antioxidant benefits, brightening properties

### Ingredients:

Active Ingredient Hydroquinone 2.00%

**Other Ingredients:** Aloe Barbadensis Leaf Juice, Ascorbyl Palmitate, Butylene Glycol, Cetyl Alcohol, Citric Acid, Coco-Caprylate/Caprates, Cucumis Sativus (Cucumber) Oil, DEA-Cetyl Phosphate, Diazolidinyl Urea, Dimethicone, Disodium EDTA, Ethylhexyl Methoxycinnamate, Glycerin, Hydrogenated Vegetable Oil, Hydroxyethylcellulose, Lavandula Angustifolia (Lavender) Oil, Magnesium Ascorbyl Phosphate, Methylparaben, Morus Bombycis Root Extract, Propylene Glycol, Propylparaben, Rosa Damascena Flower Water, Saxifraga Sarmentosa Extract, Scutellaria Baicalensis Root Extract, Sodium Bisulfite, Sodium PCA, Sodium Sulfite, Stearic Acid, Tocopherol, Tocopheryl Acetate, Vitis Vinifera (Grape) Fruit Extract, Water (Aqua)

**Home Use:** After cleansing and toning, apply a thin layer on affected areas twice daily or as directed by skin care professional. Wait 10 minutes after application of lightening cream before applying other skincare products. This will help ensure that the lightening cream is properly absorbed and will not be rubbed off. Must use an SPF 15 or greater to obtain best results. Please keep in mind that all bleaching creams need to be used a minimum of 6 weeks for good results.

**Precautions:** The safety of topical hydroquinone use during pregnancy or in children (12 years and under) has not been established. As a result, hydroquinone products should not be used in pregnant women. It is also not known whether topical hydroquinone is absorbed or excreted in human milk. Therefore, caution is advised when used by a nursing mother. Some people are sensitive to hydroquinone. It is recommended that you test for skin sensitivity before using by applying a small amount to a small patch of skin. If redness or mild skin irritation occurs after 24 hours, discontinue use. If no lightening is noted after 3 months of treatment, discontinue USE.
