Vitamin C Creme

pH 5.0
S-34801

\$40 - 2oz

PURPOSE: For dry, mature, sensitive, environmentally damaged skin, or may be used for other skin types requiring a more emollient creme.

PROPERTIES: A light-weight creamy texture, this formula is hydrating, and contains anti-oxidants that protect the skin from free radicals. It assists in skin rejuvenation and guards it against environmental elements. Recent research of Vitamin C has found it to be a vital factor in collagen synthesis, repair and protection of cell tissue. The Ascorbyl Glucoseamine™ structure is a polyamine complex containing L-ascorbic acid and polyglucosamine. This format protects the Vitamin C making it very stable while in the formula.
